

Scala

Lightweight Modular Staging

Steven Both, Toby Rufinus, Jaspreet Singh, Daniël
Stekelenburg

Now that we are familiar with Scala...

Now that we are familiar with Scala...

lets look at an awesome library implemented in Scala.

Now that we are familiar with Scala...

lets look at an awesome library implemented in Scala.

Lightweight Modular Staging (LMS)

LMS is..

'A library-based multi-stage programming approach that uses types to distinguish between binding time.'

Outline

- ▶ A gentle introduction to LMS
- ▶ The LMS pipeline
- ▶ Language virtualization
- ▶ Intermediate representation

A gentle introduction to LMS

Power function in Scala

```
def power(b: Double, x: Int): Double =  
  if (x == 0) 1.0 else b * power(b, x - 1)
```

Power function in Scala LMS

```
trait PowerA { this: Arith =>  
  def power(b: Rep[Double], x: Int): Rep[Double] =  
    if (x == 0) 1.0 else b * power(b, x - 1)  
}
```

A gentle introduction to LMS

What did we just see?

- ▶ T versus `Rep[T]` ** Uitleg hier
- ▶ `def` versus `trait` ** Uitleg hier
